Agricultural Commissioner

Agricultural Crop Damage Assessment

The Humboldt County Agricultural Commissioner is requesting information from our agricultural producers who may have suffered significant crop losses as a result of adverse weather conditions in Humboldt County. This information is necessary for determining if local producer losses were significant enough to justify requesting a disaster declaration for Humboldt County. If granted, this declaration could qualify Humboldt County producers for United States Department of Agriculture (USDA) crop loss assistance programs. **Please note:** Not all commodities may qualify for crop loss assistance. Producers must also meet USDA criteria to qualify for crop loss programs.

If you have any questions, please contact the Humboldt County Department of Agriculture at 441-5260.
