Subject: General Plan Update

To whom it may concern,

Several years ago, during the initial "General Plan Update" meetings that were held in Southern Humboldt, I was very involved with getting the "word out" to as many citizens as possible; In particular, the Avenue of the Giants. I felt passionate about EVERYONE having their voices heard about their dreams for the future of our communities. During those many town meetings with the Humboldt County Planning Staff, and George Williamson, I felt reassured that those individual voices and concerns would be respected and taken into account when the final draft was complete.

Please do not allow "special interest" groups and developers to aggressively intimidate you into making decisions that do not reflect the majority of individuals who have already felt that they have spoken! They, as well as I, have previously had a "pro-active" involvement in the process. I have chosen NOT to be "RE-ACTIVE" to the recent comments and scare tactics of a tiny minority of "dollar-driven" individuals.

Draft Plan A seems to be the closest to what our community has hoped for.

Thank you for allowing us to put our trust in your hands!

Sincerely,

Toni Stoffel
