1. Comments in letter form are welcome.
2. Later chapters will be more specific. We don't plan to make Part 1 more specific unless directed to do so. It is intended to provide general guidance.

Hi Tom,

A couple of questions re: public input comment format, etc.

1. With each Plan document "group" there will be the tables to 'vote' on; will you only be accepting public comments in the form of those tables being filled out, or are additional comments in letter form welcome?
2. Could you clarify: A good portion of this first group draft is in the tone that of a concept or idea presentation versus a course of action with specific details enumerated; which is fine if that is the overall intent - if so - will the specifics come as a result of comments received now, or later on or ?????

Thanks for any help you can provide - much appreciated.

For the NCHB,

Julie Williams, Advocate
