Comments	<p>Dear Planning Commission</p> <p>I have lived for twelve years in Humboldt County and am life-long resident of Northern California. I care deeply about the future of Humboldt County and in the face of issues like catastrophic climate change, peak-oil, energy scarcity and hopefully, sustainable energy independence I urge the Planning Commission to adopt Alternative A of the Energy Element in the ongoing General Plan update.</p> <p>We need to incorporate energy efficiency into homes, businesses, infrastructure and public facilities. We need to promote smart, community oriented development and transportation networks. Most important we need to plan for decades in the future when energy costs will soar and resource scarcity will define whether our county and economy thrives or withers.</p> <p>After reviewing the draft energy element in the General Plan Update, including alternatives A through D, I feel that Alternative A best addresses these daunting issues of energy independence that lay before us. Please support a sustainable future.</p> <p>Thanks for your time-</p> <p>Sincerely, Josh Brown</p>
