Martha:

I submit the attached manuscript currently in press (Journal of Forest Ecology and Management) as evidence of short-comings in the proposed forest policies as currently drafted. I will be happy to provide you with the final version as soon as it is available should you desire. I will not be available on June 27th to testify in support of our findings but I hope you will provide copies to committee members so that they might consider this new science. (See attached file: Olsonetal07proofs.pdf) Thank you,

Hartwell H. Welsh, Jr.
