**- NOTICE -**

Humboldt County Department of Public Works, in cooperation with the Humboldt State University Career Center, will be mapping the storm drain system in the McKinleyville Central Basin, which is bounded on the east by Central Avenue bounded on the west by Highway 101 bounded on the south by School Road and bounded on the north by Murray Road.

The first phase of this project will be field work consisting of walking the streets and mapping the storm drain system. This work will be performed by college interns and County Road Division staff. The dates and times of this work will vary due to school schedules and will include Saturdays. After the initial mapping, there will be follow-up field work consisting of locating the storm drain system using GPS surveying equipment. There may be additional field work where the storm drain system crosses private property in County easements.

The intent of this storm drain mapping project is to develop a computer-based hydraulic model of the storm drain system in order to identify drainage improvement needs and maintenance priorities.

If you have any questions, you may call Stanley Elcock, Deputy Director and Intern Coordinator at (707) 445-7421.
